Dear Hiring Manager,

I recently graduated in 2.5 years with a Bachelor of Science in Computer Science and a minor in Mathematics from the University of Texas at Tyler. During my last semester of my bachelor's program, I began pursuing a Master's in Mathematics, and I plan to further my education by starting a Master's in Cybersecurity and Data Analytics after completing my bachelor's degree.

In my academic career, I have developed a strong theoretical background and honed my skills in various domains. As a Project Manager, I successfully managed data projects and supervised interns. I was responsible for breaking down projects, creating deliverables, and setting milestones to ensure timely completion. My role required strong leadership, organization, and communication skills, which I have continuously developed.

Additionally, I have served as a Supplemental Instruction Leader (SIL) for Calculus, where I held sessions for students needing extra practice or better explanations. This experience has not only reinforced my own understanding of complex mathematical concepts but has also enhanced my ability to convey intricate ideas in an understandable manner.

My goal is to gain practical experience in the industry and apply my theoretical and technical background to real-world challenges. My academic journey has equipped me with a unique skill set, including the ability to think differently, understand, and resolve proofs. These skills have been instrumental in my transition to machine learning and data analysis.

Moreover, I bring valuable experience from my six-year tenure in the food industry, where I worked as a manager. This role taught me numerous hard and soft skills, such as leadership, organization, and training. These experiences have shaped me into a well-rounded candidate with a diverse skill set that I am eager to apply in a professional setting.

I am confident that my background in computer science, mathematics, project management, and the food industry, combined with my enthusiasm for continuous learning and growth, make me a strong candidate for various positions. I look forward to the opportunity to contribute to your team and further discuss how my skills and experiences align with the needs of your organization.

Thank you for considering my application. I am excited about the possibility of contributing to your company and am available at your earliest convenience for an interview.

Sincerely,  
Bryan Barrios
